The limb deficiency group includes individuals with traumatic amputations or dysmelia. The impaired muscle strength group includes loss of strength secondary to peripheral nervous system (PNS) damage or a brachial plexus lesion. The impaired strength group can also include ambulatory neurological impairments such as monoplegia, or mild hemiplegia. The loss of PROM can be due to joint contractures, joint abnormalities, or soft tissue restrictions. Finally this group could also include loss of great toe, or all of toes in one foot **Minimum Impairment Criteria (MIC)** Amputation/Dysmelia:

- Unilateral amputation, through or above wrist (i.e., no carpal bones present in affected limb). Arthrodesed wrist joints are not eligible.
- Unilateral dysmelia in which the length of the affected arm measured from acromion to fingertip is equal in length or shorter than the combined length of the humerus and the radius of the unaffected arm.

Athlete must meet one of the MIC as per below:

1. Must lose three muscle grades - e.g Daniels and Worthington grade 2 cannot complete one heel rise to 25 degrees. In lying may complete full range of motion with resistance. (See Muscle testing Daniels Worthingthams 8th edition pp 229, 231).

2. Brachial plexus - loss shoulder abduction loss of three (3) muscle grade points of muscle strength and same for shoulder flexion.
3. Loss of two (2) grade points of muscle strength in elbow flexion and extension.
4. Meets one criteria for PROM restriction in either the lower extremity or upper extremity.

Weigh in of Kyorugi athletes will be held in connection with the classification.

B. Poomsae (P30)

Minimum Impairment Criteria (MIC), Nuerological Impairments (P30)

- Hemiplegic Spasticity Grade 1 to 2
- Monoplegic Grade 1 to 2 spasticity in major joint, either the ankle or the elbow.
- Athetosis, Ataxia or Mixed Cerebral Palsy.

This Athlete may appear to have near normal function when running but the Athlete must demonstrate a limitation in function to Classifiers based on evidence of spasticity (increased tone), ataxia, athetosis or dystonic movements while performing on the field of play or in training. The Athlete may walk with a slight limp but runs more fluidly.

Pre-Screening Classification

In the case that you are uncertain if your athlete will meet the **Minimum Impairment Criteria (MIC)** for participation in the K40 or P30 classes please contact the WTF at para-tkd@wtf.org and a classification pre-screening can be made to help advise you if the athlete will meet the MIC or not.

Please be advised that Pre-Screening does not replace classification and that the athlete will still have to go through classification at the event.
